RE: Testimonial of Partnership

To whom it may concern:

As we have exceeded a decade of partnership with Biz-Tech, we think it is apt to present a testimonial to this valuable endeavor.

Biz-Tech's team consistently impresses us with their deep domain knowledge of the Indian industrial sector, professional project execution, responsive local support, and seamless coordination from marketing through to successful commissioning and handover. Your ability to bridge international engineering and business standards has been instrumental in the successful deployment of our solutions.

As you are aware, the now more than six projects we have completed, are complex in the extreme and there are but a handful of companies in the world capable of performing this mission. Your ability to navigate complex technical requirements and regulatory needs while maintaining the highest standards of quality and service has been a key factor in every project's success.

We value our partnership with Biz-Tech and appreciate your commitment to excellence, reliability, and long-term collaboration. Our hope is to continue this partnership for decades to come.

Please feel free to share this letter as we confidently recommend Biz-Tech as a capable and dependable partner for advanced industrial and energy solutions throughout India.

Sincerely,

Thomas Edwards  
President & CEO
