

Biz-Tech At MRO XPO India 2026

Advancing Composite Repair For Safer Skies

Biz-Tech Consultants Pvt. Ltd. successfully participated in MRO XPO India 2026, held on March 11–12 at Yashobhoomi (IICC Dwarka), New Delhi. The exhibition brought together key stakeholders from across the Aviation Maintenance, Repair, and Overhaul (MRO) ecosystem, creating a valuable platform for knowledge exchange, innovation, and collaboration.

A Strong Start: Industry Engagement & Insightful Discussions

The event began on a high note, with engaging panel discussions and strong industry participation. Day 1 highlighted the growing interest in advanced composite manufacturing and repair technologies, particularly as aviation continues to evolve toward lightweight, high-performance materials.

At our booth, visitors showed keen interest in our solutions developed by our partners AEROFORM Composites, France. The conversations reflected a clear industry shift toward adopting more efficient and reliable composite repair systems.

Key Theme: Composite Repair as a Critical MRO Capability

One of the most important discussions during the exhibition centered around “Safer Skies for Civil-Defence MRO.”

With next-generation aircraft now composed of nearly 70% carbon fibre composites, the importance of high-quality repair solutions has never been greater. This shift is redefining MRO requirements, making advanced composite repair capabilities essential for maintaining structural integrity and safety.

Showcasing Our Solutions

Throughout the two-day event, we presented a comprehensive range of composite repair equipment and solutions, including:

- Hot Bonders
- Infrared (IR) Lamps

- Heater Mats
- Radome Repair Solutions
- Composite Tools and Consumables
- Training and support services

Visitors from across the industry engaged deeply with our offerings, exploring how these tools can enhance their repair processes and operational efficiency.

Documenting Our Experience

Day 1

Day 2

Gratitude & Looking Ahead

We extend our sincere thanks to everyone who visited our booth and engaged with our team. The enthusiasm, curiosity, and insightful discussions made this exhibition a truly rewarding experience.

At Biz-Tech Consultants, we remain committed to supporting MROs and composite component manufacturers with best-in-class technologies and expertise. Our goal is to enable safer, more efficient aircraft operations through reliable composite repair solutions.

As the aviation industry continues to evolve, we look forward to strengthening partnerships and contributing to the future of advanced composite repair in India and beyond.
